

Dhrubo Mondal
Computer Science
Innovation Fellows Program - University of Florida
Herbert Wertheim College of Engineering/Warrington College of Business

Dhrubo Mondal is a senior majoring in Computer Science and minoring in Engineering Innovation. Prior to coming to the University of Florida, he earned an Associate of Arts degree and graduated Magna Cum Laude from the College of Central Florida.

At the College of Central Florida, he was awarded three scholarships for being a member of the Community of Scholars program and earned the Community of Scholars certificate for completing the program. At UF, he earned the Gerald and Elaine L. Gibson Scholarship in Engineering.

He is currently working with computer science and medical students to develop a patient education app that will aid ENT surgery patients in understanding their procedures and their life changes after it.

He enjoys working on various projects in software development to learn and prepare himself for a job in the field. His current goals is to get an internship and be more involved in college activities. After graduating, he plans to be a software developer, and as well, he plans to start and invest in technology businesses.
