Shaan Chaudhari
Chemistry/Entrepreneurship
Innovation Fellows Program - University of Florida
Herbert Wertheim College of Engineering/Warrington College of Business

Shaan Chaudhari is a senior at the University of Florida's College of Liberal Arts and Sciences, pursuing an undergraduate degree in Chemistry along with a minor in Entrepreneurship. Shaan's interests include entreprenuship, neuroscience, spirituality, sports, and music.

Born in London, Ontatrio to immigrant parents, Shaan had a diverse childhood, growing up in an immigrant community south of Toronto, Canada. Shaan moved to South Florida during gradeschool where he completed his highschool education. During his time in highscool Shaan was a finalist at the International Science and Engineering Fair, President of Health Occupations Students of America, and a member of the varisty basketball team.

While his time at UF, Shaan has served as President of the Gator Cricket Club, and been involved with various health based organizations. Shaan also worked as a lead research assistant at the McKnight Brain Institute developing a novel method of non-invasive nerve stimulation for the goal of improving cognitive outcomes in patients with Alzheimer's. Shaan has worked for start-ups companies based in Gainesville. Shaan has also participated in the Big Idea Competition at UF where he worked on a team-based venture. Additionaly, Shaan has interviewed with a multitude of prestigious dental schools in the futher diversification of his career.

Shaan currently is developing an event based-game company at the University of Florida. In the future he wishes to use his knowledge in chemistry, business, and entreprenuship for the development of a venture that promotes lasting social changes within the community he is associated with at that time.
