

**Sebastian Nathanson**  
**Chemical Engineering**  
**Innovation Fellows Program - University of Florida**  
**Herbert Wertheim College of Engineering**

My name is Sebastian Nathanson, I am a first-year chemical engineering student here at the University of Florida. I joined the Innovation Fellows program because in the future I want to become an entrepreneur, and so learning about the product development steps and cycle, as well as how one turns an idea into profit ethically is key to me. To reach our goal of providing a working prototype, I can provide communication skills as a result

of my time teaching debate in high school; packaging complex information in a succinct and understandable manner will be necessary to meet deadlines. Furthermore, my time in the Freshman Leadership Engineering Group's Involvement Committee has given me the opportunity to refine my out of the box thinking, which will be very helpful when making a cat-centric design with accompanying holiday themes. I am looking forward to this opportunity!
