

# HERBERT WERTHEIM COLLEGE OF ENGINEERING

POWERING THE NEW ENGINEER TO TRANSFORM THE FUTURE

## *Engineered Speed and Agility* Mr. Michael Cottmeyer Entrepreneur in Residence

New Engineering Building, Room 102  
Thursday, September 8, 2016 • 5:00 PM  
Food and refreshments to follow

Nowadays, most companies are consumed by speed and agility. Engineers are faced with solving problems and commercializing solutions by being faster and more agile than their competition. But how do engineers achieve desired results – without diminishing the quality of the products, services, and processes produced?

The answer lies at the root of a concept used in software development. Learn from successful entrepreneur and UF Gator Engineering alum Mike Cottmeyer how “agile” is the way to go for 21<sup>st</sup> century engineers. Mr. Cottmeyer, who serves as Entrepreneur in Residence in the Herbert Wertheim College of Engineering Innovation Institute, will take session participants on an interactive, insightful, and informative journey involving all things agile.

Following the presentation there will be time to connect with Mr. Cottmeyer and network with fellow Gator Engineers.
