

# HERBERT WERTHEIM COLLEGE OF ENGINEERING

POWERING THE NEW ENGINEER TO TRANSFORM THE FUTURE

## *Agile Leadership*

### Mr. Michael Cottmeyer Entrepreneur in Residence

New Engineering Building, Room 102  
Thursday, November 10, 2016 • 4:45 PM  
Food and refreshments to follow

The concept of “agile leadership” has little to do with software development. Instead, agile leadership involves taking effective action in times of complex, and rapid change. Successful organizations of all sizes and across all industries contain leaders possessing the ability to think in a number of different ways in response to mounting challenges in a hyper competitive global economy; engineers - and other technologists - are tasked with solving increasingly complex problems with winning solutions.

Successful entrepreneur and UF Gator Engineering alum Mike Cottmeyer will explain how agile leadership is practiced by game-changing and results-oriented engineers and technologists. Mr. Cottmeyer, who serves as Entrepreneur in Residence in the Herbert Wertheim College of Engineering Innovation Institute, will take session participants on an interactive, insightful, and informative journey involving the effective strategies and actionable tactics behind successful agile leadership practices.

Following the presentation there will be time to connect with Mr. Cottmeyer and to network with fellow Gator Engineers.
