

**Kelechi Ndukwe-Ajala**  
**Chemical Engineering**  
**Innovation Fellows Program - University of Florida**  
**Herbert Wertheim College of Engineering/Warrington College of Business**

Kelechi Ndukwe-Ajala is a fifth year Chemical Engineering undergraduate at the University of Florida. He was born and raised in Lagos, Nigeria. Kelechi has always been ambitious and is always ready to take on new tasks and projects.

While at the University of Florida, Kelechi has remained steadfast on serving others. He has been actively involved with the African Student Union and has served as the Treasurer. He currently acts as the Internal Vice President. Kelechi has also been involved with the American Institute of Chemical Engineers (AIChE), National Society of Black Engineers (NSBE), Tau Beta Phi Engineering Honor Society, Herbert Wertheim Laboratory for Engineering Excellence 527 Gale Lemerand Dr., Suite 470 Gainesville, FL 32611 Volunteers for International Students (VISA).

Kelechi has acquired both technical and soft skills, over the years, by attending various seminars and conventions like the NSBE 45<sup>th</sup> Convention. He is passionate about garnering more technical skills in manufacturing, optimized processes and business operations.

He is fascinated about fairly known random facts and is ever seeking to increase his grasp on many random facts, as possible. He is eager to engage in discussions ranging across many disciplines such as science, history, technology and culture. He seeks to balance academics with recreational and fun activities. He enjoys visits to peaceful terrains and beautiful landscapes.

Kelechi will be earning his Bachelor of Science degree in Chemical Engineering in May 2020. He plans to further his studies with a PhD in Chemical Engineering with a focus on Manufacturing while on his path to becoming a professional engineer.
