

Remal Patel
Business Administration and MSISOM
Innovation Fellows Program - University of Florida
Herbert Wertheim College of Engineering/Warrington College of Business

Remal currently studies Business Administration and is a combined degree student in Masters in Science of Information Systems and Operation Management as a third year student. Scheduled to graduate in fall 2023. Remal is active in Alpha Kappa Si which is a Professional Business Fraternity. Remal's interests also include learning, community service and a food fanatic.

Born in Toronto, Ontario, Canada as the first born out of three brothers. Remal's parents made sure to foster kindness, being family oriented and welcoming anyone or anything that comes into his life. As he moved from Toronto to Ocala at a very young age with his family, a

entrepreneurship minded dad and mom. His parents took a risk in order to give a better life to him and his younger brothers. Graduating from Vanguard High School he was a very well rounded student and played varsity soccer for three years. Remal decided to move his current background from loving to play with numbers and statistic to the University of Florida, where he found a handful of people with similar ambitions and goals in his Professional Fraternity. With the pandemic interrupting his academic life he moved back to Ocala and gave back to his community at his alma mater to coach high school soccer. There he was able to pick up on various skills such as investing, running his family owned business, and opening up a entrepreneurship mindset.

Although born as a Canadian, Remal's family background and origins are from India. And wherever he goes he always keeps a cultural aspect within him. In Ocala, his family takes a significant part of the Indian community as his dad is the President of the Indian Cultural Association. This has played a great impact into his life and he has followed his cultural background to the University of Florida. Remal's ambitious mindset has helped him heavily throughout the years and will so for many years to come.
