

Summer Torok
4th Year Industrial and Systems Engineering Student
University of Florida Herbert Wertheim College of Engineering

Summer Torok is a 4th year undergraduate student at the University of Florida, pursuing a degree in Industrial and Systems Engineering and is planning on graduating in Fall 2022. She has received the Engineering Innovation Certificate and is currently working towards the Engineering Leadership Certificate. She then intends to pursue a Master of Science in Industrial and Systems Engineering at the University of Florida.

Summer Torok grew up in Cocoa Beach, Florida and loved living right next to the beach. Spending most of her free time being outside, she found her passion for nature. She loves exploring new places and observing the natural beauty of the world. Some of her favorite hobbies include surfing, skating, and laying out at the beach. Summer also has an interest in travel videography and photography. She loves the ability to capture special moments and tell stories using her camera. In her free time growing up, Summer also played competitive soccer for fourteen years. Although she no longer plays, she still has a deep passion for running and working out.

Throughout her time at UF, Summer has been involved with student organizations and leadership roles that have focused on personal and professional development, mentorship, and extracurricular interests. For the past three years she has been involved in a philanthropic organization called Dance Marathon at the University of Florida. During her 3rd year of college, Summer Torok was selected to be the Assistant Director of Videography of Dance Marathon, which was a very high honor. Summer is a member of the Society of Women Engineers, the Institute for Industrial and Systems Engineers, and the Chi Omega Sorority. She also recently finished serving her second year as a Panhellenic Counselor, where she mentored and advised women going through the sorority recruitment process at the University of Florida. Summer recently became a Teaching Assistant for the Engineering Innovation and Engineering Entrepreneurship classes. Additionally, this past summer, she interned at Hangtech, a small start up company, where she worked alongside a group of fellow students designing mobile applications and prototype devices using artificial intelligence for healthcare advancement.

In the future Summer Torok hopes to travel the world. Her goal is to visit every continent at least once. She also plans on hiking El Camino de Santiago which is a pilgrimage trail across Europe that takes about a month to walk.
