

Jed Arcenal
Business Administration Information Systems
Innovation Fellows Program - University of Florida
Herbert Wertheim College of Engineering/Warrington College of Business

I am a junior by credits and I just transferred to UF this fall from my local college, College of Central Florida. I had a non-traditional route of post high school education, so I am very grateful to have the opportunity to attend this institution and participate in the classes and extra-curricular activities. I don't have any relevant work experience only a couple of part-time jobs in retail and fast food, and I worked part-time at my college as a tutor this past year.

My main hobby is playing video games, I grew up playing them and I haven't stopped. My interests are mainly in the tech field and business in general, I find the potential of VR/AR particularly fascinating. Growing up I had to learn how to set up and use most of the technology my family bought and my father started and runs his own business so those two fields are familiar.

I am Filipino-American and both of my parents are first generation immigrants. I am very thankful for them because they worked really hard to get here and provide a better life for me and my siblings. Unfortunately, I am not very intune with my heritage and culture but I treasure my family and they are very important to me.
