The Office of Student Transition and Retention (STAR) has openings for graduate instructors with an academic background in science, technology, engineering, or math to serve as graduate instructors to teach calculus, chemistry and/or physics for our freshman summer-bridge program called STEPUP.

Freshmen Summer Bridge Program

The Successful Transition and Enhanced Preparation for Undergraduate Program (STEPUP) was created during the summer of 1994 as a means of bolstering the successful transition and retention rates of UF first-year engineering students.

During the six-week program, graduate instructors work as part of a team of faculty, staff, and students to provide UF-level instruction and academic guidance to first-year students preparing for the engineering profession. Benefits of the position include gaining instructional experience, hourly compensation, and up to a three-credit-hour assistantship for graduate instructors invited to return to the position after their first year with the program.

Interested applicants should submit a resume with a cover letter detailing interests in the position & applicable experiences, and a personal reference to Stephen Roberts, Director, STAR Office at srobe@eng.ufl.edu by no later than May 1, 2022.

Compensation
$12.00 – $15.00 hr.

Flexible Schedule
20 hours a week
Summer B Semester

Assistantship
3 credit hours
for returning Instructors
